Congratulations.
Now your cat's bathroom will be as clean as your cat.

TABLE of CONTENTS:
1. Unpack & Check 2. Assemble 4 Easy Pieces
3. Laundry Room Set Up 4. Bathroom Set Up
5. Ready, Set, Go CatGenie 6. Your Cat & Your CatGenie
BEFORE SETTING UP YOUR CATGENIE, TAKE CARE OF YOUR CATS!

If your CatGenie goes in a different location than the old litter box, DON’T set up CatGenie. First move the old litter box to the new area. Once your cats are comfortable with the new location, then set up your CatGenie.

TIP: If the litter box or boxes need to be moved a great distance, our cat behaviorists recommend moving the old box or boxes in small increments over time to the new location. When your cats are comfortable with the final destination, proceed with the CatGenie set up.

TIP: Keep track of when your cats use the litter box. This will be helpful when you set up for automatic cleaning.

WHERE SHOULD CATGENIE GO?

BEST LOCATION FOR CATGENIE...
is a Bath or Powder Room OR a Laundry or Utility Room

BECAUSE YOUR CATGENIE NEEDS:
1) fresh water from a cold water supply line that connects to a sink, toilet or washing machine
2) a toilet or laundry drain pipe for cat waste removal
3) an electrical outlet.

WILL IT FIT?

MEASURE THE AREA to make sure that your CatGenie will fit.

ALL YOU NEED is a wrench or pliers to attach supplied T-Adapters. For Laundry Room use pliers; For Bathroom use pliers, or an Adjustable or 5/8” wrench.

NOW YOU’RE READY TO UNPACK YOUR CATGENIE
UNPACK & CHECK

UNPACK with caution. Do not drop. If you suspect that your CatGenie is defective, don’t use it. Contact CatGenie Support immediately.

E mail: support@catGenie.com
Call: 1-888-SELF-WASH
1-888-735-3927

CHECK that you received all of the following 12 items:

1) Processing Unit with attached Water Supply Hose and Power Cord
2) Cat Acclimation Guide
3) Owners Guide
4) Simple Set-up Sheet
5) CatGenie Base with attached Drain Hose and Hook
6) Two SaniSolution Smart Cartridges™
7) Hopper Cover
8) GenieHand™
9) One Laundry Room T-Adapter
10) One Bathroom T-Adapter
11) One Box Washable Granules™
12) One Box Replenishment Washable Granules™

CATGENIE TERMS

- SaniSolution Smart Cartridge: Dispenses solution
- Control Panel: Auto and Manual Start Buttons
- Hopper Cover: Stores GenieHand, hides Hopper
- Hopper: Hole where solid waste is deposited
- GenieEyes: Sensors delay auto wash if cat enters
- Processing Unit: Holds motors and electronics
- GenieHand: Scoops, Scrubs, Sifts. Attaches to Arm
- Washable Granules™: Satisfy cat’s need to cover
- Bowl: Where cats and Washable Granules go
- Brim: Encircles the Bowl; attaches to Base
- Base: Very bottom of the CatGenie

Before assembling, write down your serial number located at the back of the Processing Unit. Go to catGenie.com to Register WARRANTY. Fill out and your CatGenie will automatically be registered for Warranty, traceable for service, and you’ll be eligible for exclusive offers. Your Serial #
2. CatGenie™ ASSEMBLING 4 EASY PIECES

1) Bring Base, Processing Unit, Hopper Cover, GenieHand, plus the T-Adapters and this Set Up Sheet to the site. Site must have a water source, a drain and an electrical outlet.

3) Place the CatGenie Base in position. Make sure it's level. If you need more space, assemble the CatGenie nearby then carefully slide it into its final position.

4) a) Pull Black Clip and steel Arm forward.
     b) Attach GenieHand to the Black Clip. A click tells you that it's secured.
     c) Push Arm and GenieHand into the upright position.

5) a) Insert Processing Unit by lining it up with the Base opening
     b) then carefully slip it into its slot.
     c) Fit water hose and electrical cord into grooves behind the Base.

6) a) Fit Hopper Cover into grooves in the Base and on the right side of the Processing Unit.
     b) CatGenie name indicates the front.

2) Turn over the Base to access the 9' Drain Hose.
   a) Uncoil amount needed so Hose Hook can reach waste drain or toilet.
   b) Thread the Waste Hose through the Base groove.
   c) Store extra hose under Base. Avoid crimps or sharp angles in the Hose.

GO TO 3 For Laundry Room Set Up; GO TO 4 for Bathroom Set Up
3. **CatGenie**

**LAUNDRY/UTILITY ROOM SET UP**

You’ll only need a pliers and the large T-Adapter

1) Have a towel handy. Shut off the COLD water supply line on the wall by the Washing Machine.

**TIP:** A cold waterline may have a blue valve, be labeled, or you can feel the pipe for coldness.

2) Unscrew the COLD waterline hose under the turn-off valve. Loosen the connection with pliers. Finish disconnecting the hose by hand. Hold the hose upright so water won't drip.

3) Screw the lock nut on the washing machine hose to the threaded opening of large T-Adapter.

**TIP:** If you need to use a tool to tighten the connection don’t over tighten.

4) Now attach the hose and T-Adapter to the waterline. Make sure the T’s Lock Nut is movable. Tighten the Lock Nut around the pipe threads.

5) Screw the CatGenie hose on to the T-Adapter.

**CAUTION:** Do NOT use pliers to tighten the CatGenie Lock Nut. Hand tighten only.

6) Insert the Genie Drain Hook into the drainpipe. Make sure it is secure in the pipe.

**CAUTION:** It is important NOT to force the Hook into the drainpipe. If the CatGenie Drain Hook and the washing machine drain hose do not easily fit into the drain pipe use a drain Y-adapter (available at hardware stores). Drainage pipes higher than 4 feet may slow down the draining of CatGenie.

**GO TO 5 For NEXT STEPS**
4. **CatGenie™ BATHROOM/POWDER ROOM SET UP**

You’ll only need a wrench or pliers and the small T-Adapter

1) Access the cold water line to a toilet or sink.

**WARNING:** If accessing water from a sink, ONLY use the COLD water line. HOT WATER WILL DAMAGE THE UNIT. Fresh water to the toilet is cold.

2) Shut off the COLD water by turning the valve on the toilet or sink waterline. Have a towel handy to catch drips.

3) For toilet, check that water is off by flushing the toilet to empty the tank.

**WARNING:** If tank keeps re-filling, turn the valve again. If it still fills, STOP and call 1-888-735-3729

4) Unscrew waterline flex pipe. Use pliers or wrench to loosen the lock nut connection.

5) a. Connect small T-Adapter to flex-pipe lock nut.
   b. Screw the T’s Lock Nut on to the shut-off valve. Use a wrench for final tightening of connections.

6) Connect the CatGenie water supply hose to the T-Adapter and HAND TIGHTEN. Don’t use a tool on its plastic lock nut.

7) Place CatGenie Drain Hook over the toilet bowl then lower the toilet seat. Make sure the hook is not squeezed when the toilet seat is down.

**NOTE:** If sink or toilet waterline is a rigid pipe, measure pipe and lock nuts. Replace with a flexible water pipe available at any hardware store. It’s a simple screw OFF and ON. When done, proceed with CatGenie set up.

5. CatGenie™

READY, SET, GO CATGENIE
Whether Laundry or Bathroom Set Up, do the following next.

1) Have a towel handy. Turn water back on. Check all connections for leaks. Use a tool to tighten any fittings that drip.

CAUTION:
Do not use a tool to tighten the CatGenie fitting. It has a pressure seal. Hand tightening is all it needs.

2) Empty the box of Washable Granules into the Bowl. The box of Granules will fill to the level indented on the inside of the Bowl. Spread the Granules evenly inside the Bowl.

CAUTION:
Use only CatGenie Washable Granules™. DO NOT use or mix cat litter in the CatGenie. Any other materials will cause severe damage to the unit and will void your Warranty.

3) Slip a Smart Cartridge into slot on top of the CatGenie. Side arrow points to back. Push down firmly to activate Cartridge. Good for 60 washes.

CAUTION: CatGenie can’t function when the Cartridge is empty. ALWAYS HAVE AN EXTRA Cartridge on hand. The Smart Cartridge releases the exact amount of cat-safe, vet-approved SaniSolution. The Smart Cartridge protects the CatGenie operation and the health of your cats.

4) Plug in the CatGenie electrical cord. Best to plug into a GFCI certified wall socket.

5) When plugged in, the CatGenie will make a series of beeps and all its LEDs will light up in sequence. This means it is operating correctly.

NOTE: If this doesn’t happen, check to make sure that the Processing Unit is properly in place by lifting it up and replacing it into its slot.

6) To run a Cleaning Cycle, press then release the START CYCLE button.

TIP: Make sure that your cats are not nearby.

MAKE SURE YOUR CATS ARE NOT NEARBY WHEN YOU FIRST RUN YOUR CATGENIE
6. CatGenie™ YOUR CAT & YOUR CATGENIE

Every cat is different. From our experience with over 15,000 cats, most, once shown the Bowl and Granules, know it’s where to go and use it immediately. If CatGenie goes in the same place as the litter box, adjustment is usually easier. A percentage of cats need time to adjust to something new. During this time, it is safe and normal for cats to refrain from “going” in the first 24 to 48 hours.

Don’t make a fuss over the CatGenie. Act normal, natural. Let your cats be curious. Don’t hover about. Don’t follow them into their bathroom. Treat them when they use it.

1) If your cats don’t use the CatGenie immediately, put their old litter box next to or near it. DO NOT clean out the old box. The dirtier it gets, the more cats will prefer the CatGenie. Once your cats use CatGenie, remove the old litter and box.

2) When running the CatGenie during the first week, shut the door or make sure your cats are not nearby. The new sound of the cleaning process might startle the cats. Over time they will associate the sound with their new, always cat-clean cat box.

3) Until your cats are comfortable with CatGenie, activate the cleaning by pressing the START CYCLE button. In time, you can program the Auto Set so CatGenie can run on its own. See Owner’s Guide for details.

4) Check the CatGenie Cat Acclimation Guide for details. See picture Guides and Manuals on line at: www.catGenie.com To consult, call toll free: 1-888-SELF-WASH 1-888-735-3927

NOTE: Unless you know that your cats are not using the CatGenie, it is important to run at least one cleaning cycle per cat every day. Clean even if you do not see any waste in the box as urine won’t show on the Washable Granules.

HOW OFTEN SHOULD I RUN MY CATGENIE?

One Cat.........Clean 1-2 times per day
Two Cats.........Clean 2-3 times per day
Three Cats......Clean 3-4 times per day

WARNING:
Do NOT mix cat litter or used litter with the Washable Granules in the CatGenie. Cat litter will cause severe damage to the CatGenie mechanism.

If you have any problems or questions please call 1-888-735-3927

Don’t attempt to fix or tamper with the CatGenie
